

SANDQVIST

FW24 Collection

20 YEARS OF NORDIC LANDSCAPES

The Nordic landscapes, with its vast unpopulated areas, soaring mountains, remote cabins, as well as an urban city lifestyle, have always been the main inspiration for us. Accordingly, our bags are uncomplicated and beautiful.

This is how we described ourselves 20 years ago, and it's still highly relevant today. This season is no exception. Our source of inspiration remains the same, and as always, we strive to create the best possible products, both for the user and the planet. That's why our products are timeless, functional, and built to last.

We run Sandqvist with our hearts as a compass, and our values are at the forefront of everything we do: We act responsibly, we offer sustainable quality, and we make repairable products. In addition, we share Scandinavian inspiration, and we are friendly and inclusive.

The only way forward for us as a responsible brand is to take sustainability into every account of our growth and to constantly challenge ourselves. With minimal impact on the planet, we will continue to make the best bags for every moment.

Thank you for being part of the Sandqvist family.

WE DO WANT YOU TO SELL OUR BAGS

But as you partner with us, consider this.

PROMOTE MINIMIZED PURCHASES

At Sandqvist, we encourage mindful consumption. We want our customers to avoid buying things they don't need and only invest in items that can be used and cherished for a long time.

ENCOURAGE MAXIMIZED USE

The most effective way to minimize a product's environmental and social impact is to use it often and over a long period of time.

EDUCATE ABOUT CARE PRODUCTS

Our bags are crafted for durability and repairability, but how they are cared for matters. Whenever someone purchases a bag from our collections, we want to ensure they know about our care products and how to give their bag a long life.

HIGHLIGHT THE IMPORTANCE OF CIRCULARITY

When it's time to part with a bag, passing it on to be reused is better for the environment than recycling it.

TAKE TIME TO EXPERIENCE NATURE

Nature is our constant source of inspiration, and we encourage everyone to experience it. We believe that through a deeper appreciation of the outdoors, we can collectively commit to its preservation.

OUR RESPONSIBILITY

Our work goes beyond the products we produce, and stretches from how we design them, carefully choose the materials, work with our suppliers, transport the products and engage our customers into consuming them in a sustainable way.

All leather we use has been tanned in tanneries that conforms to our highly set standards regarding social and environmental conditions, which has been third-party verified by the Leather Working Group.

At Sandqvist we strive to re-use waste materials in all of our products, and extend the life of our bags through our in-store repair service and care products.

We only use organic cotton which is grown without harmful chemical pesticides and artificial fertilizers. The cotton is harvested on a small scale by farmers in Adilabad, India, ensured of a decent salary and working conditions.

Our recycled nylon is made from post-industrial waste, derived from discarded nylon-based products. Reclaimed nylon waste, which otherwise would be incinerated, are shredded and turned into a new, lightweight and durable fabric.

All of our bags are designed to last for a long time. We hold our fabrics and trims to high quality standards, making sure that durability and resistance is a cornerstone of our product development.

Our recycled polyester comes both from post-consumer waste of PET-bottles and chemically recycled textiles, also collected from consumer waste. This process means the fabric gives a new lease of life to waste material that is not naturally biodegradable.

Steering clear of harmful chemicals means that we keep those chemicals out of local water supplies. By restricting harmful chemicals and placing higher requirements than the legislation, we also contribute to a healthy work environment for the people producing our bags.

We take great pride in maintaining a kind supply chain, with fair wages and safe work environments for everyone involved from sketch to finished bag.
