

SANDQVIST

SS25 COLLECTION

Sandqvist was founded in 2004 by three childhood friends, Anton, Daniel and Sebastian. As lovers of the great outdoors living in Stockholm, they felt the need for bags that could be used both in the city and in the forest. From the start, therefore, Sandqvist has combined extremely useful features and stylish, minimalist design with a clear focus on sustainable, environmentally-friendly materials.

OUR CORE VALUES

ACT RESPONSIBLY

We care for the environment, and we're committed to do as little harm as possible. To ensure that our products are produced under good working conditions, we work steadily to improve our business practices. We share what we learn—hoping it will inspire others.

BE FRIENDLY AND INCLUSIVE

We believe in making people feel respected, valued and supported. Everyone should have the same opportunity to advance and make a difference.

OFFER SUSTAINABLE QUALITY

We aim to create long-lasting, durable products in the highest quality—using recycled or low impact materials.

MAKE REPAIRABLE PRODUCTS

We care for the environment, and we're committed to do as little harm as possible. To ensure that our products are produced under good working conditions, we work steadily to improve our business practices. We share what we learn—hoping it will inspire others.

SHARE SCANDINAVIAN INSPIRATION

We are not driven by trends or limited to seasons, instead we aim to create timeless, functional and beautiful design inspired by the Nordic landscapes.

SPRING SUMMER 2025

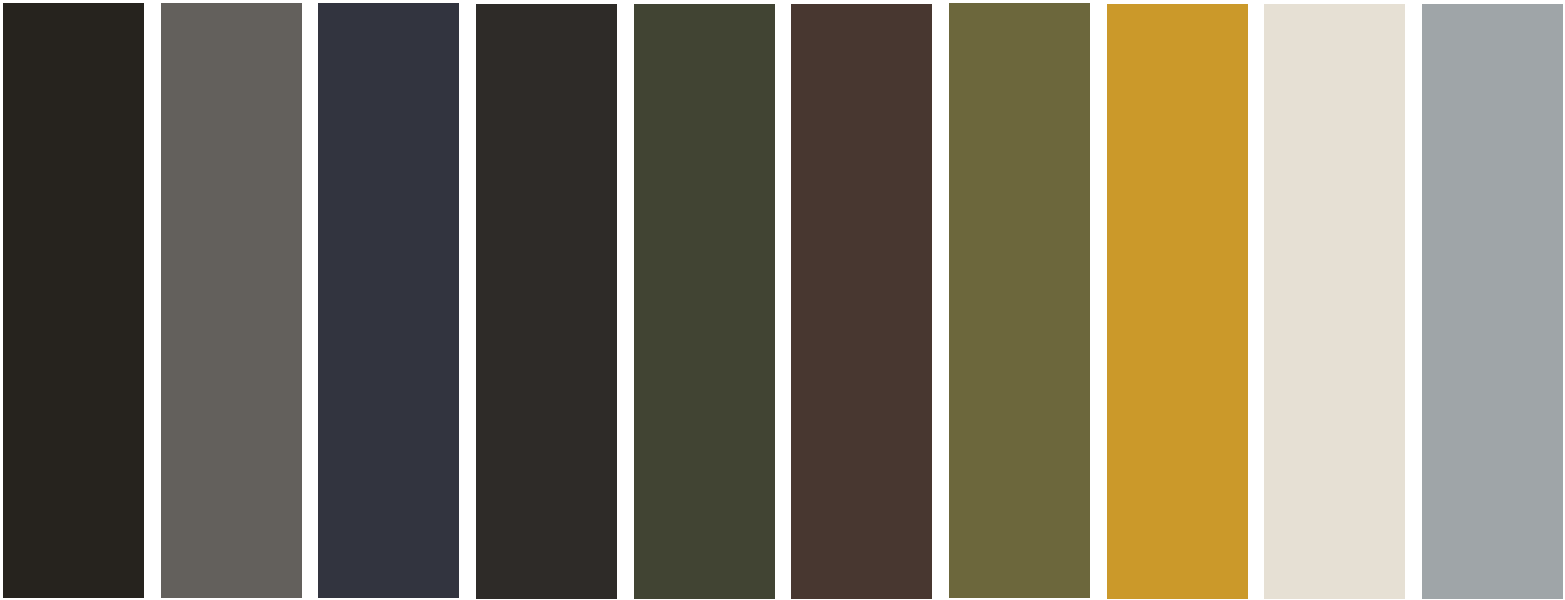

After two decades dedicated to researching, designing, and developing bags, we are proud to introduce the SS25 collection. This new collection pays great respect to the Sandqvist heritage, whilst carefully added precise refinements and essential modern features.

Our SS25 collection caters to a variety of needs and occasions: whether you're spending your days in the city, exploring the outdoors, traveling near and far, or commuting daily. With a steadfast commitment to being a trusted bag maker dedicated to responsible manufacturing

With two decades of experience, we're now excited to bring Sandqvist into the future – our SS25 collection marks the beginning of a new era.

GO

The GO series is a minimalistic yet multi functional bags and accessories collection that draws inspiration from modern traveling and everyday commuting. With the most vital needs of the Sandqvist persona in mind, the range has been developed as a modular system to help you organise and optimise your packing whenever on the go. The lightweight collection ranges from larger, carry-on size bags for the longer travels down to smaller everyday bags for commuting as well as practical travel items. Shell materials, linings, webbings and tapes are all made out of hard wearing recycled fibers and the hardware is made of durable, ultra light aluminium.

ICON

The ICON series is named icon for a reason. Originally named BERNT and ILON, the urban roll top backpacks have evolved to become the modern icons of the Sandqvist brand. Designed to be worn in the city, inspired by our dear Nordic landscapes. For the SS25 collection our backpacks have been carefully tuned to perfection. The even so iconic to Sandqvist recycled polyester shell and lining are kept while hardware has been updated to aluminium for an even lighter product. Not to forget, the series has grown.. We welcome this season the ICON satchel bag to the family!

STREAM

The STREAM collection is our water resistant range developed for everyday commuting. With a sleek aesthetics, these bags are designed to be comfortably worn while also being packed with loads of functionality. The tightly woven TPU covered recycled polyester is matte to its finish and soft to its touch. Without a doubt, these bags will keep your belongings safe and dry in any weather. For SS25 we have expanded the collection by adding a technical cycling messenger bag and a smaller crossbody bag to store smaller items.

EVERYDAY

The EVERYDAY series is a contemporary collection with a nod to the Sandqvist heritage. References are iconic while the execution is refined and packed with today's essential functionalities. The urban range, made out of recycled polyester shell and lining combined with soft leather trims and details includes a great variety of bag designs. Whether you are the backpack, tote bag or briefcase type, there is always something for you to carry on your everyday journey.

OUR RESPONSIBILITY

Our work goes beyond the products we produce, and stretches from how we design them, carefully choose the materials, work with our suppliers, transport the products and engage our customers into consuming them in a sustainable way.

We only use organic cotton which is grown without harmful chemical pesticides and artificial fertilizers. The cotton is harvested on a small scale by farmers in Adilabad, India, ensured of a decent salary and working conditions.

Our recycled polyester comes both from post-consumer waste of PET-bottles and chemically recycled textiles, also collected from consumer waste. This process means the fabric gives a new lease of life to waste material that is not naturally biodegradable.

All leather we use has been tanned in tanneries that conforms to our highly set standards regarding social and environmental conditions, which has been third-party verified by the Leather Working Group.

Our recycled nylon is made from post- industrial waste, derived from discarded nylon-based products. Reclaimed nylon waste, which otherwise would be incinerated, are shredded and turned into a new, lightweight and durable fabric.

Steering clear of harmful chemicals means that we keep those chemicals out of local water supplies. By restricting harmful chemicals and placing higher requirements than the legislation, we also contribute to a healthy work environment for the people producing our bags.

At Sandqvist we strive to re-use waste materials in all of our products, and extend the life of our bags through our in-store repair service and care products.

All of our bags are designed to last for a long time. We hold our fabrics and trims to high quality standards, making sure that durability and resistance is a corner stone of our product development.

We take great pride in maintaining a kind supply chain, with fair wages and safe work environments for everyone involved from sketch to finished bag.
